ORDER SPECIFICATIONS
☐ Quote Only ☐ Quote & Proceed

Step 1: Determine the band size:

- Measure circumferentially below the bust where a regular bra sits.
- Drop the tape 2 - 3" (5 - 8cm) and measure around the bottom of the rib cage.
- Use the larger of these two measurements as the band size. Round odd numbers up. i.e.: 31 = 32

Step 2: Determine the cup size:

- Measure circumferentially around the fullest part of the bust.
- Subtract the determined band size measurement from the bust (either 1a or 1b depending on which one is larger) measurement to determine cup size.

Difference

2" or less (5cm or less)
2 - 4" (5 - 10cm)
4 - 6" (10 - 15.25cm)

If there is a difference of more than 6" (15.25cm), increase by one band size.
